ATKIN OLSHIN SCHADE ARCHITECTS

Atkin Olshin Schade Architects is a 20-person architecture, interior design, planning, and preservation firm with offices in Santa Fe, NM and Philadelphia, PA. Since its founding in 1979, the firm has worked on a wide range of projects that have won national, state, and local design and preservation awards. The Santa Fe office is particularly focused on excellence in affordable housing. This work has been widely recognized in print and award programs.

Surroundings Studio LLC of Santa Fe is a multidisciplinary design studio focused on transforming the built environment through innovative landscape architecture, urban design and planning. They have over 50 years of experience in landscape architecture, strategic and regional planning, community development, master planning, and site development for award-winning projects of all scales.

WILSON & COMPANY

For more than eight decades, clients have chosen Wilson & Company to help them move from concept to completion, unused spaces to productive places, underutilized to efficient facilities, and rural and urban challenges to achievable solutions. Wilson & Company has led the site development plan approval process for many large and complex housing and development projects in Santa Fe.

Peter Brill, Inc. (PBI) is an independent construction consulting firm located in Santa Fe. With decades of experience in the role of general contractor, Peter Brill recognized the need for a consulting practice focused on local issues in architectural programming, land use, and design and construction, and continues growing new and long-term relationships with design and building professionals of every kind.

TREY JORDAN ARCHITECTURE

Trey Jordan Architecture was established in 1994 and is known for a distinctive and identifiable aesthetic that has an intentional sense of place; architecture which could be termed “Contextual Modernism”. Located in Santa Fe, NM, our designs respect the historic context of all projects, while expressing a current sense of time and place. We approach our work with the intention of creating architecture that is restrained, sensitive to its surroundings, and embodying a sense of thoughtful intent. TJA is an experienced, dedicated team, which, provides a full range of design services from the broadest level of planning and architectural design to detailed interior furnishings, finishes, lighting and casework.

Onion Flats Architecture is an innovative multi-disciplinary practice in Philadelphia, PA. The firm specializes in sustainable design and building practices and has produced multiple LEED & Passive House Certified projects. Significant experience in their own design/build/development projects provides clients with innovative & cost effective solutions.

da Silva Architecture promotes Contempory Regionalism throughout New Mexico through the design of buildings that are elegant, comfortable, and energy-efficient. dSA seeks to incorporate state-of-the-art building techniques and materials to create spaces that speak to the history, culture, and traditions of the region. Miguel da Silva is a certified Passive House consultant.
Shawn Evans, AIA, has learned that architecture performs best when it comes from a deep engagement with the community it serves. His goal is to untangle the many issues that can impede the vision and execution of a project, so we can give communities of all shapes and sizes the voice that they deserve in the process. In addition to leading both architectural and planning projects, Shawn is our director of preservation and cultural projects. He has led master plans for many large and complex historic sites and institutions. Current clients include the Santa Fe Botanical Garden, Isleta Pueblo, Santo Domingo Pueblo, New Mexico State University, and Los Poblanos Historic Inn and Organic Farm. Shawn studied architecture at Texas A & M University as an undergraduate and received his Master of Architecture from the University of Pennsylvania. He has taught architectural design at Temple University and the University of Pennsylvania. Nationally recognized as a leader in historic preservation, he has spoken at numerous regional and national tribal, preservation, and museum conferences and received the prestigious James Marston Fitch Mid-Career Grant, through which he collaborated with Pueblo tribes on a study of their contemporary preservation practices. Shawn manages the Santa Fe office of Atkin Olshin Schade and brings more than 20 years of professional experience to the practice. Shawn is a registered architect in New Mexico (#005250), Arizona, Texas, Colorado and Pennsylvania.

Evan Geisler, LEED AP, Senior Project Manager, Atkin Olshin Schade Architects

Evan Geisler, LEED AP, Senior Project Manager at AOS Architects, has over 13 years of architectural design management, project management and construction management qualifications. His experience spans from project inception through to project commissioning and closeout. Responsibilities comprise site surveys, design and construction management (both in house and as external consultant), bidding process, construction administration, and direct management of project budgets and schedules. For AOS, he has managed the sustainable design and certification process for the Miller Campus Center at SMU-in-Taos, LEED Silver and the Domingo Village, a Low-Income Housing Tax Credit development for Santo Domingo Pueblo, the first project in NM to utilize the 2015 Enterprise Green Communities Standards.

Education
Master of Science in Real Estate, University of Hong Kong, 2009
Bachelor of Architecture, Southern California Institute of Architecture, 2001
Bachelor of Fine Art, Non-Diploma, Art Center College of Design
LEED – NC, Accredited Professional, United States Green Building Council

Professional Experience

Garron Yepa, Staff Designer, Atkin Olshin Schade Architects

Garron was born and raised in the New Mexico region. He brings his cultural and regional knowledge to every project he works on. As the son of a Navajo (Dine) mother, and a Jemez Pueblo (Towa) father Garron has a perspective all his own. Being a fluent Towa speaker has given him insight into another way of describing the world around him. He has fed his exploratory education with extended stays in New Hampshire, Alaska, and New York City-always returning home to restore his grounding attendance in his communities. His professional experience in commercial interiors and background in engineering have been an asset to his designs. He has worked on a plethora of cultural commercial projects in a wide variety of capacities; from as-builts to post occupancy evaluations, AutoCAD technician to Excel scheduler, coordinator of consultants to administrator of installations, in his young career his experience is vast. Garron is motivated by implementing the most appropriate solution for the given situation, and he brings this experience and curiosity with him to AOS.

Education
Master of Architecture, University of New Mexico, 2011
Bachelor of Arts in Engineering modified with Studio Art, Dartmouth College, 2003
Double Major in Native American Studies, 2003

Professional Experience

Santo Domingo Pueblo Historic Rehabilitation Projects, NM
Domingo Village, LIHTC Development, Santo Domingo, NM
Pueblo de Cochiti Plaza Revitalization Plan, Cochiti, NM
NMSU Corbett Center Student Union, Las Cruces, NM

For the last year, Garron has been working closely with artists from Santo Domingo Pueblo on the design of the Santo Domingo Heritage Trail.
Trey Jordan has been designing buildings in Santa Fe since 1990 and established TJA in 1994. TJA is a small studio, with a team approach focused specifically on residential projects, both single-family homes and multi-unit compounds. His work over the past 20 years in Santa Fe has encompassed projects ranging from the renovation of historic adobes in the core historic district to construction of modern, minimalist houses that abstractly reference the history of New Mexico. Trey thinks the nature of traditional materials and the rich vocabulary of vernacular architecture can be combined to speak not only about the past, but the future. Multiple references form the architecture of “what’s next.” This is what Trey’s work attempts to explore. Trey is interested in the stories told by northern New Mexico villages, hundreds of years old, and the wonderful unplanned composition that results from growth over time. He is interested in referencing these places without falsely recreating them, looking at their patterns and spacial relationships. He believes that architecture, even within a strong historic context like Santa Fe, should be of its day, as well as its locale.

Tushita Blade, Associate, Trey Jordan Architecture

Originally from New York City, Tushita Blade joined Trey Jordan Architecture in 2008. She is responsible for the design and implementation of architectural interiors and detailing, casework, lighting design, finish specification and interior design on both residential and commercial projects. Her responsibilities include design, budgeting and project management.

Tushita entered Pratt expecting to study painting, but after being exposed to several 3-dimensional design classes, switched her major and earned a Bachelor of Industrial Design degree. She has always been conscious of the impact of design, both good and bad on our everyday lives and strives to bring that awareness into every aspect of her work. Integrity, thoughtfulness, intention and sense of place, guide her approach to design. Before moving to Santa Fe, Tushita worked on a diverse array of projects including the design of public spaces, commercial interiors, museums, exhibitions, architectural graphics and signage.

Timothy E.G. McDonald, RA, LEED AP, CPHC, CPHD, Principal, Onion Flats

Timothy McDonald is the President and CEO of Onion Flats LLC, a licensed architect in Pennsylvania, New Jersey and Massachusetts and an Associate Professor of Practice in Architecture at Temple University. In 1997 he co-founded Onion Flats LLC, a Philadelphia based real estate development/design/build firm. As a partner in Onion Flats, Tim's role is Lead Architect and Construction Manager for many of Onion Flats' projects. He has been teaching and practicing for over 20 years with a focus on community development, multidisciplinary thinking and making, high-performance building technologies and alternative construction methodologies. Through his research and practice, Tim, along with his partners at Onion Flats, has developed, designed and built some of the first LEED Gold and Platinum projects in the country and the First Certified Passive House, Net-Zero-Energy-Capable project in Pennsylvania. In 2014 Tim initiated a research project in collaboration with the Pennsylvania Housing Finance Agency to develop a Net-Zero-Energy-Capable building standard for all affordable housing by 2030 and is actively promoting this initiative with Housing Finance Agencies in 36 other States. Additionally, Tim is a Certified LEED Accredited Professional and Passive House Certified Consultant and Tradesman.

Kenneth Francis, Principal, RLA, RA, ASLA, Surroundings

Kenneth Francis is a founding partner and principal of Surroundings, a New Mexico based multidisciplinary design studio. He holds a Bachelor’s degree in Architecture from The Cooper Union in New York City and a Master’s degree in Landscape Architecture from Harvard’s Graduate School of Design. While studying at Harvard, he was awarded a travel grant to research the historic and cultural landscape of the acequias in Northern New Mexico. As a direct result of this study, Kenneth's work has been focused on innovative and sustainable water practices in every scale of project that comes into the studio. Kenneth has 18 years combined architecture and landscape experience and has presented on the topic of green infrastructure at multiple conferences, including the 2014 ASLA National Convention. He was recently interviewed on PBS Austin and Kenneth also spoke at the Innovative Stormwater Infrastructure Conference for ASLA New Mexico. He was also profiled in Smithsonian Magazine for the stormwater design features of El Parque del Rio, a newly completed example of green infrastructure along the Santa Fe River. Kenneth will serve as Landscape Architect for this project.

Education
Masters of Landscape Architecture, Harvard University Graduate School of Design
Bachelor of Architecture, The Cooper Union, Irwin Chanin School of Architecture

Professional Licenses
Registered Landscape Architect: New Mexico, #446, Texas, #2771
Registered Architect: New Mexico, #004700

Building Creative Communities Conference 2014 Presenter on Wayfinding
NM MainStreet Conference Presenter on Contextualism Permeable Materials

Sandra Donner, RA, Principal-in-Charge, Surroundings

Sandra Donner is a Founding Partner of Surroundings. Having worked on a wide variety of landscape and master planning projects, Sandra finds sustainable water and materials strategies are essential at the inception of all projects. She believes deeply in communicating and working as a collaborative, in order to create the most thorough, thoughtful and creative project possible. Sandra’s landscape and site designs are built upon process-driven testing and experimentation to arrive at powerful and new solutions for her clients. Her methodical accuracy for drawing proves to be an asset on every project. Prior to receiving her Bachelor’s in Architecture from the Cooper Union, she received a Bachelor in Fine Arts from Parsons School of Design. Sandra will serve as Principal-in-Charge, Project Manager and Project Lead for this project.

Tyler Ashton, PE, Project Manager, Wilson & Company

Tyler Ashton, PE, joined Wilson & Company, in spring 1998, shortly after earning his engineering degree at New Mexico State University. As part of our New Mexico operations, he has gained experience in all facets of civil engineering. His primary responsibilities at Wilson & Company have included the design of subdivisions, rural and urban streets, recreational parks, storm management systems, hydrology/hydraulic studies, sanitary sewer and water distribution lines. Mr. Ashton has extensive experience offering Site Development Managers a number of viable alternatives. He has facilitated the site development approval process for obtaining permits for construction by interacting with Planning and Zoning committees in numerous municipalities in New Mexico. He is experienced in representing and advising the client to ensure a smooth process to secure site plan approvals. He has offered assistance in the review process to draft optimal Site Development Agreements and clarify the ECCR's governing the property. He is experienced in handling issues involving annexation, rezoning, general map amendments, variances, special use permits, revisions to plats and public infrastructure improvements. He is aware of the sense of urgency to provide timely service and can help the client meet and exceed schedules. Mr. Ashton has worked closely with various public works departments, cities, public schools facilities planning and construction departments, and county utilities departments. His design experience is strengthened with construction observation experience of numerous public school projects, the Southwest Activity Node Park, La Tierra Trails, among many other projects.
